PROFILE

Quality Assurance Engineer & Client Delivery Consultant with ~ 4 years of experience in QA engineering, consulting, and client-facing solution delivery across hospitality, smart city, financial services, and transportation industries. Proven expertise in managing end to end QA and Development lifecycles, leading user training, and engaging with stakeholders to ensure smooth adoption of cutting-edge technology solutions. Skilled in manual, functional, and API testing (Postman), with expertise in AI-powered smart mobility, airport guest services, and POS/E-POS systems. Proficient in Agile methodologies using JIRA, Confluence, and TestRail.

CORE COMPETENCIES AND SKILLS

- **Software Testing:** Manual, Web, Mobile (iOS & Android), API Testing, Regression, UAT.
- **Tools & Technologies:** Postman, JIRA, Confluence, TestRail, SQL, Selenium WebDriver.
- **Delivery:** End-to-End QA, Client Engagement, User Training, Solution Consulting.
- **Domains:** Airport Services, AI-Powered Smart Parking, POS/E-POS, Financial Applications.
- **Soft Skills:** Stakeholder Communication, Client Dealing, Problem Solving, Leadership, Agility.

WORK EXPERIENCE

Software Test Engineer – PARKonic, Dubai (UAE)

March 2024 – Present

Led the QA and delivery of AI-driven parking technologies and airport hospitality solutions, ensuring seamless guest experiences and smooth system adoption.

KEY PROJECTS:

DXB Greet & Go – Dubai Airports (Terminal 3)

- **End-to-End Ownership:** Managed full delivery lifecycle ; from requirements gathering and QA planning to testing, go-live, and post-launch monitoring.
- **Comprehensive Testing:** Validated QR code scanning, kiosk integration, driver dispatch workflows, mobile app status updates, fallback handling (e.g., backup limousine assignment), and payment processing.
- **Client & Stakeholder Engagement:** Worked closely with Dubai Airports, Valtrans, hotels, and limousine operators to align solution requirements and readiness.
- **User Training & Adoption:** Conducted hands-on training sessions for airport staff, drivers, and hotel operators covering portal usage, QR workflow, and guest management.
- **Operational Impact:** Delivered the world-first guest reception platform replacing manual paging, reducing congestion in Terminal 3, and enhancing passenger experience.

On-Street AI-Powered Parking – Smart City Dubai Initiative

- **AI-Based Automation:** Delivered QA for UAE’s first fully AI-powered, ticketless parking network, covering 36,000 spaces across Dubai.
- **End-to-End Testing:** Validated ANPR camera detection, real-time overstay monitoring, frictionless entry/exit, and integration with Salik’s eWallet for automatic payments.
- **Smart City Integration:** Ensured alignment with Dubai’s Smart City 2030 and Net Zero goals, testing multilingual accessibility and user-centric flows.
- **AI & Data Validation:** Verified AI-driven algorithms for accurate license plate recognition, parking duration tracking, and predictive monitoring.
- **Client & User Support:** Collaborated with Salik, Dubai Holding, and other stakeholders to ensure system reliability and provided training on app usage and ticketless operations.
- **Impact:** Enabled a sustainable, fully automated parking ecosystem with zero fines, optimized city traffic flow, and enhanced user satisfaction.

Parkonic Mobile & Web Application

- Validated booking, payment flows, and app-store readiness for iOS, Android, and Web platforms.
- Taskonic Application (Internal Staff Tracking)**
- Tested staff tracking and task allocation features, delivering user training for operational adoption.
- Intercom Tap-and-Go System**
- Tested and delivered a seamless customer-staff communication system, improving response efficiency.
- NI POS Machine Payment Integration**
- Ensured robust handling of multi-currency transactions, refunds, reconciliation, and compliance for POS/E-POS.
- Other Projects:**
- Car Wash, Buggy, Loader Bay, PTW Modules.

- Associate Test Engineer – Wipro, Noida (India)
- March 2022 – Feb 2024
- Delivered QA for financial, healthcare, and wealth management systems ensuring compliance, accuracy, and security.
 - Designed and executed SQL-driven test cases, set up environments, and supported Agile project teams.

- Key Projects:**
- **Secure Act 2.0 Implementation:** Tested regulatory compliance workflows for financial applications.
 - **Healthcare Applications:** Validated secure and reliable patient data processing.
 - **Wealth Management Systems:** Delivered high-quality QA coverage for financial advisory tools.

EDUCATION

- **Bachelor of Technology (ECE)** from Dr. A.P.J. Abdul Kalam Technical University (2018–2022)
