Professional Summary

QA Automation & AI Testing Lead with 9+ years of experience in Web, Mobile, API, and Database testing. Skilled in building automation frameworks from scratch using Selenium, Java, Appium, Cucumber, and REST Assured. Proven track record in leading QA teams, defining test strategies, and driving CI/CD automation with Jenkins, GitHub/GitLab, and Azure DevOps. Experienced in AI/ML workflow validation, agentic AI testing, and automation of AI-driven applications, ensuring accuracy, reliability, and compliance. Adept at collaborating with cross-functional teams, managing stakeholders, and improving quality metrics to deliver high-performing products at scale.

Key Skills

- AI & Automation Testing: AI model validation, Agentic AI workflow testing, ML pipeline verification, test automation for AI-driven apps, AutoGen, OpenAI, MCP, LLM, LangFuse, RAG
- Automation Tools & Frameworks: Selenium (Java/Python), Cypress, Appium, TestNG, Cucumber, REST Assured, Postman, AI automation using Python- AutoGen- MCPs- LLM
- Programming & Databases: Core Java, SQL, MySQL, Database Testing
- CI/CD & DevOps: Jenkins, GitHub/ GitLab, Azure DevOps, AWS S3
- QA Leadership & Management: Test strategy & planning, stakeholder communication, quality metrics, reporting, resource management
- Testing Expertise: Functional, API, Regression, Manual & Automation testing, Agile/Scrum methodologies
- Soft Skills: Team leadership, cross-functional collaboration, mentoring, problem-solving

Work Experience

QA Automation Team Lead

Blenheim Chalcot India, Mumbai | Nov 2021 – Present

- Defined test strategy and aligned QA processes with business objectives, ensuring delivery of high-quality fintech and AI products.
- Managed resource allocation, sprint planning, and stakeholder communication across multiple AI and automation projects
- Led a team of automation engineers to design and implement end-to-end automation frameworks from scratch, improving test coverage by 70%.
- Led QA and automation efforts for fintech AI products, including KMC AI FORGE (AI-driven eligibility and verification app for BTL mortgage applications) and KMC LOP 2 (next-gen lender onboarding platform).
- Designed and executed end-to-end automation strategies (Web, API, and AI workflows) ensuring 99% accuracy in eligibility checks and portfolio validations.
- Built test frameworks for AI model validation, Equifax integration, portfolio form automation, and mortgage/CMI statement verification.
- Partnered with product and engineering teams to validate Agentic AI workflows for affordability, intent detection, and Unified Agent handovers, improving user experience and reducing drop-offs.
- Automated the Kloo financial application (Web, API, and Mobile) using Selenium, Java, Appium, and BDD, reducing manual testing effort by 40%.
- Designed and executed API automation suites with REST Assured, enabling faster integration testing and cutting release cycle time by 30%.
- Implemented CI/CD pipelines in Azure DevOps, improving build validation and deployment quality with zero critical defects in production.
- Mentored junior testers, conducted code reviews, and set best practices for automation, improving overall team productivity by 25%.

QA Automation Engineer

Tata Consultancy Services Ltd., Mumbai | Aug 2016 – Nov 2021

- Spearheaded web automation for Cisco projects using Selenium, Java, and BDD, reducing regression testing time from 10 days to 4 days.
- Automated API testing with Postman and REST Assured, accelerating test execution and reducing API validation time by 60%.
- Integrated automation with AWS S3 and SQL databases, enabling seamless test data management and improving test reliability.
- Collaborated with global cross-functional teams in Agile/Scrum environments, consistently meeting delivery deadlines across 60+ releases.

- Recognized as a key performer for driving automation adoption and reducing manual testing dependency across critical modules.

Projects

- **KMC AI FORGE (Since June 2024)** – AI-powered eligibility and verification system for BTL mortgage applications. Validates company eligibility, runs Equifax credit checks, automates portfolio forms, AST checks, and mortgage/CMI statement validation. Enhanced automation coverage improved testing speed and reliability by **40%**.
- **KMC LOP 2 (Since June 2024)** – Lender onboarding platform for mortgage products. Focused on **automation of workflows, API validation, and AI-powered agent flows**, ensuring smoother integrations and faster time-to-market.
- **Kloo (30 months)** – Financial project with multiple features like Visa card creation, bank transfers, fund allocations, and expense management.
- **Cisco (60 months)** – Worked on channel team for web applications involving quoting, pricing, and automation solutions.

Education

- MBA/PGDM – Information Technology | Pune University | 2020
- B.Sc – Computers | Aurangabad University | 2016
